

Tamara Silva

Full Stack Developer | Frontend Specialist | JavaScript, React.js, Node.js, SQL, MongoDB |
Economist & Magister in Finance

Full Stack Developer specialized in Frontend, with a background as Economist and extensive experience in Finance within multinational companies. My technical expertise includes JavaScript, TypeScript, React.js, Express.js, Redux.js, Node.js, Next.js, PostgreSQL, MongoDB, among others—skills developed through bootcamps, courses, and hands-on experience in real-world projects. I am passionate about creating efficient, scalable, and user-friendly solutions, leveraging my analytical mindset and technical proficiency to solve complex challenges.

Latest Projects

 **Full Techno (E-commerce):** <https://full-techno.vercel.app/>

Description: E-commerce application developed using the MERN stack, designed to deliver a friendly user experience and robust backend reliability. Implemented RESTful APIs for managing products, users, and orders, ensuring efficient data flow and scalability. Built a responsive and intuitive interface with React and TailwindCSS. Integrated JWT-based authentication for secure user access and Redux for effective state management.

Technologies: React, Redux, Node.js, Express, PostgreSQL.

 **Flotarium (Online booking platform):** <https://flotariumspa.vercel.app/>

Description: Appointment booking application for spa services, enabling users to seamlessly schedule and manage appointments, including full CRUD functionality. Built with React and Vite for fast and responsive performance. Integrated real-time booking functionality and calendar views to enhance user experience and simplify scheduling. Developed backend validation to ensure data integrity and implemented automated email notifications for booking confirmations.

Technologies: MongoDB, Express, React, Node.js, MailerSend.
